

Introduction to Econometrics

Moinul Islam

9/16/2022

Table of contents

| | |
|---|-----------|
| Preface | 3 |
| 1 Nature and scope of Econometrics | 4 |
| 2 Statistical Inference | 5 |
| 3 The Simple Regression Model | 6 |
| 4 Multiple Regression Analysis: Estimation | 7 |
| 5 Multiple Regression Analysis: Inference | 8 |
| 6 Multiple Regression Analysis: Further Topics | 9 |
| 7 Asymptotic properties of OLS | 10 |
| 8 Heteroskedasticity | 11 |
| 9 Time Series data Modelling Dynamic Processes | 12 |
| 10 Autocorrelation | 13 |
| 11 Endogeneity – omitted variables, measurement error and simultaneity | 14 |
| 12 Instrumental variable estimation and two stage least squares | 15 |
| 13 Logit and Probit Models for Binary Response | 16 |
| 14 Non Stationary Time Series | 17 |
| 15 Simultaneous Equations Models | 18 |
| References | 19 |

Preface

1 Nature and scope of Econometrics

2 Statistical Inference

3 The Simple Regression Model

4 Multiple Regression Analysis: Estimation

5 Multiple Regression Analysis: Inference

6 Multiple Regression Analysis: Further Topics

7 Asymptotic properties of OLS

8 Heteroskedasticity

9 Time Series data Modelling Dynamic Processes

10 Autocorrelation

11 Endogeneity – omitted variables, measurement error and simultaneity

12 Instrumental variable estimation and two stage least squares

13 Logit and Probit Models for Binary Response

14 Non Stationary Time Series

15 Simultaneous Equations Models
